The university has It has 36 departments and 11 faculties.

## ABOUT THE SEMINAR

Food processing industry in India is a sunrise sector that has gained prominence over the recent years. Availability of raw materials, changing lifestyles and appropriate fiscal policies has given a considerable push to the industry's growth. This sector serves as a vital link between the agriculture and industrial segments of the economy. Strengthening this link is of critical importance to reduce waste of agricultural raw materials, improve the value of agricultural produce by increasing shelf-life as well as by fortifying the nutritive capacity of the food products; ensure remunerative prices to farmers

as well as affordable prices to consumers. Entrepreneurship plays a very important role in the economic development of a country. Entrepreneurship increases supply of manufactured goods, promotion of capital formation, development of local enterprises and skills and creation of employment opportunities. This seminar on “**Entrepreneurship Development in Food Processing Sector**” will aim to create a forum to exchange and explore the new ideas and opportunities of entrepreneurship development in the various fields of food processing sector. The programme will include invited talks by eminent scientists/ entrepreneur/ academicians and presentation of papers (oral/ poster) by the participants on various subthemes of the seminar.
